

Silobags

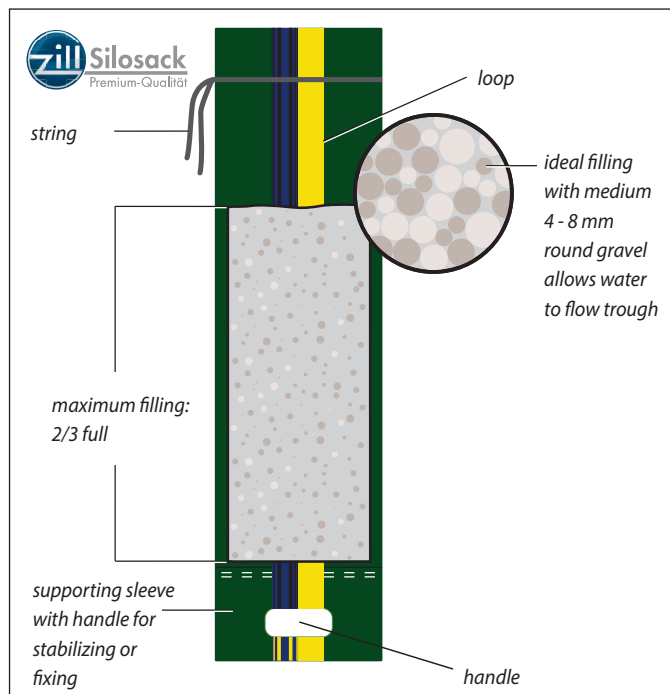

by Zill – essential für successfull covering

Silobaggy by Zill are exclusively manufactured from high quality and virgin HDPE. Recent weaving technology and strict quality controls ensure a steady weave, a maximum UV-Stability, a high tear resistance and a long and useful life.

Our silobags guarantee a complete sealing of the silo edges. By placing the bags approx. every 5 meters adross the silo, the silage cover experiences an additional fixation. The silobags fix each other in place by means of our supporting sleeve system, quick'n fix. Ther handling of the bags is improved by handles, loops and strings.

-  **Micro-meshed monofil yarns, highest resistance**
-  **Durability: up to 10 years or more in use**
-  **Saves time: no tires, no sand**

HABSBURG
